

EAS Lodewijk Woltjer Lecture - New views of the Galaxy (No 1129)

📅 30.06.2021 ⌚ 14:00 - 14:30 🏆 Prize winner
🔗 Wednesday Plenary

Amina Helmi¹

¹ University Of Groningen

Our understanding of the Milky Way and its constituents is undergoing a revolutionary change driven primarily by the Gaia space mission, and which is further reinforced when combined with spectroscopic surveys from the ground. In this talk, I will highlight a few of the results stemming from the analysis of the truly spectacular Gaia data releases. In particular, I will focus on what we have learned about the assembly history of the Milky Way so far.
